

# Utah Hereford Assn's Summer Field Day

THE ANNUAL Utah Hereford Association summer field day, held in the Uintah Basin and hosted by registered breeders in Duchesne and Uintah Counties, gave visitors an opportunity to see several new developments on ranches toured.

First stop was at the Leo Brady ranch. Brady, relatively new in the purebred business, had excellent cattle on display. At the Clair Winterton ranch, second on the list, visitors saw a number of fine breeding bulls ready to sell. At the Fred Evans ranch, the third stop, the current crop indicated results of a breeding program emphasizing

and packer happy," he noted. "The packer wants a 16-inch rib eye and 1/2-inch backfat; you have to make a compromise between the two."

In choosing a herd bull, Largent suggested avoiding extremes.

"Don't move from a type 3 bull to a type 5 all at once," he advised. "Go slow. In making drastic changes you might well breed out desirable traits. Check the disposition of bulls. Watch for alertness and stamina."

Bud Snidow and Tom McCord, American Hereford Association officials, gave an update on what was happening in the organization. Snidow pointed out that even though times were tough, the Hereford breed continues ever more popular. There are 13 Register of Merit Shows being held this year around the country.

Hal Mitchell, president of the State Hereford Utah Association, reported that the annual Golden Spike Sale would not be held at the same time as the Golden Spike Show (the last. of September) this year. The sale will be held on November 3.

"I hope and pray that we can always have the co-operation needed," said Snow. After Mr. Snow's brief history, Lee Jensen, president of the Hospital Board, expressed his appreciation to all those who have worked to make this new addition a

"We can see today that the people of Duchesne County have recognized a need and have taken appropriate measures," said Jensen. "It is a great privilege to live among people like this." He said the main goals of the County Commissioners and the Hospital Board are to provide improved health care as well as attracting additional doctors. He said

hospital in the hands of the Duchesne County residents.

"We are happy as a Board to have this new addition approved," said Jensen. Mr. Jensen commended the Hospital Board for their work, the staff for their input regarding the new facility, and the County Commissioners for the work they put into the project.

into the project.

"We now have the opportunities to attract more good doctors to the community," said Jensen. After his remarks, Commissioner Moon closed the ceremony with his remarks.

"This hospital is like life insurance," said Moon. "It's nice to have when you need it." He pointed out that the clinic in Duchesne, construc-

ted with money made available through the passage of the bond, will be dedicated shortly.

"We are behind this project 100 percent," said Moon. "It's worth the \$5 million to improve the facilities to save one of our children." With the completion of the speeches, the Commissioners and Hospital Board were presented with a gold-plated shovel and the official groundbreaking took place.

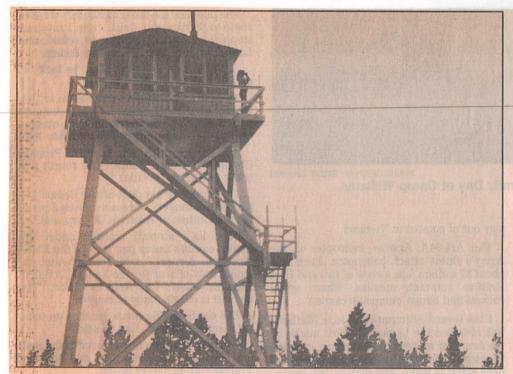

Construction crews have arrived at the hospital for site preparation work. The project is expected to take about 18 months for the new construction and about six months for the remodeling work.

GROUNDBREAKING—Work on the expansion of the Duchesne County Hospital began officially Monday morning with the groundbreaking ceremonies. Pictured left to right are Alton Moon, Loryn Ross, Chad

Evans, Gordon Snow, Lee Jensen, Lawrence Yack, Ted Weiner, Jim Reidhead, Alva Snow, Dr. Condie, Howard Todd, Carlene Jensen, and Calvin Kowallis.

Utah's only remaining tower is atop Ute Mountain near Flaming Gorge.

# Lookouts scan horizon for trouble

monitors buzz the treetops and airplanes equipped with infra-red cameras soar high above mountains and canyons snapping pictures of the terrain below seeking out unseen

Forest and wild-land officials use the latest technology to detect forest fires and size up existing fires obscured by smoke.

The techniques are impressive, but foresters in a few places in the western United States still rely on lookouts equipped with binoculars and a good vantage point to locate mountain blazes and alert firefighting officials.

The only such lookout left in Utah is situated atop Ute Mountain overlooking Sheep Creek Canyon in the Flaming Gorge Ranger District.

The lookout, built in 1937 by the Civilian Conservation Corps, was the place rangers watched for fires in five counties surround-

Helicopters fitted with heat-spotting video ing Flaming Gorge until the doors were locked in 1968. The tower stood empty for 18 vears and fell into disrepair but has been restored and is back in service, staffed by volunteer rangers.

> Ute Mountain Lookout is also important for the history it preserves. Only a select few individuals are part of the aerial reconnaissance crews that fly the planes and helicopters, but through the volunteer program the Forest Service has made it possible for many people to provide an important service by watching for fires while enjoying nature's diorama from one of the best vantage points imaginable.

> It is after the lightning that the lookout's binoculars are focused intently on small wafts of smoke rising from trees near and far. Lightning-caused fires are a particular concern during extremely dry summers like this year when the mountain storms have provided plenty of lightning accompanied by little or no rain.

Lookouts use a two-way radio to communicate with other foresters who send ground teams armed with shovels, rakes and hoes to investigate smoke sightings. Even when the tower lookout isn't the first person to spot a fire, the lookout is sometimes used to help guide crews to the site of smoke or flames after they are reported by someone else.

Fire officials say many fires are reported by motorists, campers and other passers-by who see a fire or a lightning strike. Rangers also keep a trained eve out for suspicious smoke.

In areas where natural resources have a particularly high value and where the threat of fire is particularly high, airplanes make routine passes taking pictures with infra-red filin that detects heat and can identify a fire or smoldering hot spot.

It takes several hours before the film can be delivered and processed, but reconnaissance flights during the night when the air and ground are cool make hot spots show up the best.

The Church of Jesus Christ of Latter-day Saints has established a mission to the Indians of the Indians o offering a full Relief Society, Primary, Mutual Improvement Assn. program in addition to regular services.

Long ago the Episcopal Church established the St. Elizabeth's Mission to the Utes which is still active today.

## Ground Observer Post

Indian residents are engaged in the new Ground Observer Corps established at Whiterocks.

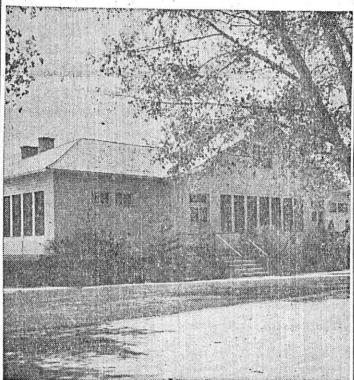

The town is the scene of some of the colorful sun dance and bear dance celebrations. The bear dance is described by a tribal member as the first thunder of spring and the joy of the bear in knowing he will have plenty of food. Women choose partners for the bear dance.

Only Indian braves dance the sun dance which lasts four days and in which dancers take no food.

The visitor to Whiterocks realizes that the Uintah Basin has been almost the last in Utah to be dotted with modern settlements yet was among the first to be interlaced by the trails of the early trapper and explorer.

WHITEROCKS CAFETERIA - White students and Indian students use this Whiterocks School cafeteria which was once part of the Whiterocks Indian School until four years ago when it became part of the Uintah School Dis-

FORMER INDIAN SCHOOL—The former Indian school now accommodates about 80 white children from surrounding areas and about 90 Indian students as a Uintah public school.

# 400 Scouts Expected At High Uinta Camp

Boy Scouts, Explorers and leaders from the Duchesne, Moon Lake, Roosevelt and Uintah Scout Districts are expected to be registered Monday for the opening day of the 1956 High Uintah Scout Camp to be held at the Yellowstone Campsite in north central Duchesne County.

The encampment will be directed by Rulon Dean Skinner, field scout executive for the Uintah Basin, assisted by Rowan C. Stutz, Duchesne, general chairman of the camp committee.

W. W. Clyde, Springvile, president of the Utah National Parks Council, and Floyd Loveridge, Provo, scout executive, will be council visitors at the camp.

Adult staff members of the camp are Mr. Stutz, Elvin O. Barker, Neill C. Jensen, Dr. John E. Smith, Duchesne; James E. Bacon, Spencer Squire, Max Todd and Rulon Dean Skinner, Roosevelt; Glen Mohlman and W. Grant Peel, Altamont; La-Rell Anderson and Jack F.

Jerry Murray, Myton; Bruce Frisby, Larry Pope, DeNile Frisby, Larry Pope, DeNile Williams, Vernal, and Mike Borden. Bonanza.

Monday afternoon, after the camp is fully established, activities were to center around the waterfront and fishing. The council has provided the cmp with two 20-man rubber boats, 10 one-man ruber boats, two bows with arrows, handicraft material to sell and badges for the giant four-district court of honor slated at the public campfire program, Friday night.

Tuesday morning, explorers wishing to make the 25-mile, three-day trail experience trip wil be given final instructions by James E. Bacon, explorer activities chairman, before they head up Swift Creek to upper lakes of the High Uinta's.

NO INDIAN GARB - These Ute children fr rocks enjoy their modern way of life com shoes instead of moccasins. Their lives have with the new prosperity of their tribesmen.

### First Utah Settlement

First Utah Settlement
Historians have established
Whiterocks as the site of Fort
Robidoux, first year-long settlement of white men in Utah.
Antoine Robidoux, trapper and
trader, established his fort on
the Uintah River no later than
1832, about 56 years after Father Escalante visited the area
in 1776.
Trappers and traders on the
wearing mountain trails fought
to reach the post where provisions and shelter were available.
Kit Carson and John C. Fremont were among those who
stayed at the fort.
It's a new look today. Fort
Robidoux is buried beneath the
sands of time and fast disappearing are the remnants of an

years ago.

The new reservation takes on
the modern look as Indians
spend their new government incomes on homes, cars or trail-

comes on homes, cars or trailers.

The settlement is built around church and school. Until four years ago the government maintained the Indian school at Whiterocks, At that time the school was valued at \$225,789. The buildings are impressive in the wide valley of Indian dwellings and ranch homes.

In Ulntah School District.

In Uintah School District Four years ago the school became a part of Uintah School District and during the past year about 80 white children and 90 Indian children were schoolmates.

The school serves students of eight grades from Toridell and other areas lying about a dozen miles north of Roosevelt. There are six teachers including the principal, Norwood Hardy.

Within the next year or two the school will become an elementary school with junior high

mentary school with junior high school students going to Alto

nah.
The Church of Jesus Christ of Latter-day Saints has established a mission to the Indians. offering a full Relief Society, Primary, Mutual Improvement Assn. program in addition to regular services.
Long ago the Episcopal Church established the St. Elizabeth's Mission to the Utes which is still active today.

# Layton Home Project Sale Seen To Veterans

ward the eventual sale of Verdeland Park, government housing project, was taken Monday. The

project, was taken Monday. The Public Housing Administration, Housing and Home Finance Agency, San Francisco, made an "offer of sale" announcement. The advertisement was to appear in Salt Lake newspapers Tuesday.

Ralph L. Rampton, project manager of the war-born project, said that 223 dwelling structures, containing 399 units, would be sold. Also included will be a one-story cinder block administration building containing 6,349 square feet, a frame storage shed containing 652 square feet, and a total of 72.73 acres of land.

feet, and a total of 72.73 acres of land.
Offers for purchase will be received for a 60-day period between June 26 at 8 a.m. and Aug. 24 at 4:30 p.m.
The sale will be made only to a group of veterans organized on a mutual ownership or cooperative basis, the offer said. The group must be a legally constituted organization, sole purpose of which is to provide housing on a mutual ownership or co-operative basis.

or co-operative basis.

The Verdeland Park NonProfit Housing Corp. was recently chartered for just such
a purpose. Leon D. Young, president of the board of directors,
a slum area.

LAYTON - Another step to- said that the group would attempt to meet the specified requirements.

quirements.

He said that the group has to furnish evidence that its membership equals at least 50 per cent of the total number of dwelling units. "We have about 48 per cent now," he said. Each member must pay to the organization at least \$50 before the offer can be made to PHA.

"The big question, as far as

ization at least 500 before the offer can be made to PHA.

"The big question, as far as we are concerned," said Mr. Young, "is 'How much is it going to cost us?" He said that the board of directors is in the dark as to what the sale figure will be. Some 'time ago, it was estimated that the price might happroach the three-quarter million dollar mark.

Richard L. Stine, attorney for the corporation, will go over the legal forms furnished by the PHA and tell the directors at their next meeting Thursday night just what has to be done to comply.

The project is being sold under provisions of the Lanham Act.

Its sale to occupants had been

Act.

Its sale to occupants had been protested by Layton city officials, who preferred that the buildings be sold "off site" and the land sold for building lots to individuals. They said they feared it might deteriorate into a slum area.

# Funding shortfalls take toll on Flaming Gorge

■ Forest Service: Created 22 years ago to set example of management, area still offers inadequate services.

By Lee Davidson Deseret News Washington Bureau chief

WASHINGTON - When Congress created Flaming Gorge National Recreation Area in Utah and Wyoming in 1968, it ordered the U.S. Forest Service to make it "a showcase" of proper management.

But 22 years later, Flaming Gorge offers inadequate visitor services, facilities have been allowed to deteriorate and planned improvements have been deferred - all because of inadequate funding, according to a newly released congressional audit

The U.S. General Accounting Office - Congress' watchdog agency - said most of the other 24 special recreation areas also managed by the Forest Service nationally suffer similar problems. Instead of being showcases, they often endure less-than-desirable services

Conditions at Flaming Gorge were used in the audit as examples of inadequate visitor services and substandard maintenance caused by funding shortfalls. Some findings

- "At Flaming Gorge, Forest Service interpretive staff declined from as many as 12 in 1970 to one in 1989. As a result, weekend interpretive programs for visitors that were held at campgrounds during the May-through-September visitor season have been eliminated since 1983."
- · Visitors "receive limited information about boating safety and regulations, environmental issues affecting the area or the geology, cultures and history that make the area unique.

## National recreation area

Deseret News graphic

- The four Forest Service boats used "for safety and information patrols, facility maintenance and rescue operations on the 91-mile-long reservoir were taken out of service in the mid-1980s because of funding shortfalls."
- The Forest Service since 1988 has contracted with county government to jointly operate and maintain one boat to patrol the reservoir. But the report said an official said that "at least five boats are needed to conduct adequate safety and information patrols."

Please see GORGE on B2

# GORGE

Continued from B1

• Flaming Gorge staff "reported that necessary preventive maintenance work on complex sewage and water systems had not been done." It quoted an official saying five fulltime people would be required, but "in 1988 he did not have the resources to assign anyone full-time responsibility for maintaining these systems. Consequently, the systems were vulnerable to breakdowns during peak summer weekends. An area official reported that a few breakdowns have occurred that required closing a campground."

Funding increases in fiscal 1989 allowed three full-time maintenance staff.

 Among facilities deferred at Flaming Gorge because of lean bud-

gets were a boat ramp and an information site. However, the area has 22 campgrounds and picnic sites, nine boat ramps, four boat campsites and two visitor centers. It reported 680,000 recreation visitor days in 1987.

• The Forest Service itself had recognized many of the problems. A 1987 report on Flaming Gorge and Sawtooth National Recreation Area in Idaho concluded, "capital investments are deteriorating and many improvements will soon reach a point where public health and safety will be compromised. This could result in the need to close some facili-

Auditors examined 20 of the 25 special recreation areas managed by the Forest Service. It found that eight had service below even basic maintenance levels, 15 had inadequate visitor services or cleanup and 10 reported delaying or dropping planned projects because of budget shortfalls.

The audit said funding for Forest Service recreation projects in general decreased about 26 percent from 1980 to 1986, which apparently caused most of the problems. Also, the Forest Service gave no funding priority to special recreation areas.

The report said funding has increased from 1987 to 1989, but was still below the 1980 level in terms of constant 1989 dollars. Funding for Flaming Gorge went from \$618,610 in 1986 to \$1.5 million in 1989.

The Forest Service in 1988 also announced a plan to use more volunteers and to seek funding from public and private groups to help stretch federal dollars.

But the audit agency said it "believes that the limited amount of resources provided through this strategy are not likely to enable the Forest Service to achieve its planned levels of facility development and showcase levels of operation."
